

Fellowes®

NEATO®

Media Labeling Products

The Fellowes/Neato design software offers several templates for all types of media, along with a wide selection of high quality, copy-right-free color and black & white digital background images formatted exactly for labels and inserts. Simply install the software, design the graphics, and print onto the labels using your laser or inkjet printer or copier. Then using the CD label applicator included in the kit, apply the CD label to the CD...perfect every time. But don't stop there! Complete your presentation with Jewel Case insert labels, booklets and J-cards. The software allows you to list the contents, add bar codes, import images from other sources, so the end result is complete!

Media Labels

The pressure sensitive and die cut labels are available in photo quality gloss or matte finished. Heat and age tested for permanent adhesion, Fellowes/Neato labels won't damage discs, peel off in drives or cause data readback errors. The special permanent, non-ooze adhesive offers compatible processing through toner infusion copiers, Inkjet and Laser printers. If you are planning to use the CD labels, purchase the kit so you can use the applicator for precision placement of labels onto the CD. If you are interested in labels outside the realm of the CD, review the listing below for the 3.5" floppy, Zip, Audio, VHS tapes. No matter what the type of media, Fellowes/Neato has the template and labels for you.

Why use markers when you can produce Professional Labels?
